# VALDOCS TECHNICAL MANUAL

## FOR PROGRAMMERS

	Page
Introduction.....	1
<b>Chapter 1: The Human Applications Standard Computer Interface.....</b>	<b>3</b>
Development and Theory.....	3
Theoretical Background.....	3
The Challenge Accepted.....	4
Research Methodology.....	4
Case Study: The Automobile.....	5
Architectural Stabilization.....	6
The Mechanics of Stabilization.....	6
In Search of a Human Interface.....	8
Fundamental Principles.....	9
The Computer is a Tool.....	9
Clearly Label the Controls.....	10
Transportable Knowledge.....	11
Design Out Technical Choices.....	12
Predictability.....	13
Simplicity.....	13
Defang the Computer.....	14
What you See.....	16
Consumer Quality.....	17
Beyond Theory.....	17
The Menu.....	17
The Choices.....	18
The System Controls.....	19
The File Controls.....	19
The Applications Keys.....	20
The Typestyle Keys.....	21
The Third Menu Level.....	21
Screen Standardization.....	21
Rules for Menus.....	22
The HASCI Keyboard.....	22
Types of Physical Controls.....	23
Conclusions.....	24
<b>Chapter 2: Overview of Valdocs.....</b>	<b>25</b>
Basic Hardware.....	25
Software Versions.....	25
Bank Switching.....	25
TPM Operating System.....	26
Valdocs Support System.....	27
Valdocs Applications.....	27
Rules for Menus.....	27
Resident Modules.....	29

<b>Chapter 3: The TPM Operating System.....</b>	<b>32</b>
QX-10 Memory Organization.....	33
TPM Memory Map.....	33
Zapple Resident Monitor and I/O System.....	34
Command Syntax.....	35
TPM/CPM Comparison.....	42
Function Calls.....	42
PIOS Jump Table Vectors.....	67
<b>Chapter 4: SYSINIT .....</b>	<b>69</b>
<b>Chapter 5: The Video Driver Program.....</b>	<b>74</b>
Interfacing to TPM-II.....	74
Graphics Compatability.....	74
Bit Definitions.....	75
D-OPCODES.....	76
Special Character Functions.....	84
Return Selected Data.....	85
Return Flags.....	87
Return Error Return Codes.....	88
Screen Handling Operations.....	89
Vector Drawing Operations.....	99
Font and Style Design.....	105
<b>Chapter 6: The Valdocs Editor.....</b>	<b>108</b>
Introduction.....	108
History.....	108
File Types.....	108
Storing a Document.....	109
Restart File.....	109
Long File Handler.....	110
Other Functions.....	110
Hard Characters.....	110
Soft Characters.....	111
Imbedded Sequences.....	111
Control Characters.....	111
<b>Chapter 7: The Valdocs Indexer.....</b>	<b>115</b>
Introduction.....	115
Index Structure.....	115
File Structure.....	115
File Headers.....	116
Index Operations.....	116
Operation Commands.....	117
<b>Chapter 8: Other Valdocs File Controls.....</b>	<b>120</b>
MAIL.....	120
MAIL Protocol.....	120
PRINT.....	123
SYSINIT Spooler Operation.....	123

Spooler Capacity.....	123
Screen Selections.....	123
The Address Book.....	123
The Hash Table.....	124
The Hash Formula.....	124
Hash Collisions.....	124
Deleting a Name.....	125
Address Book/Mailing Label Header Format.....	125
Hash Record.....	126
Address Card Format.....	126
SENDLOG and RECVLOG Formats.....	127
Error Messages.....	127
Modem 7 Program.....	128
<b>Chapter 9: Valdocs Applications.....</b>	<b>132</b>
MENU.....	132
CALC.....	132
BCD Format.....	132
ASCII/BCD.....	133
GFLOAT.....	133
DADP.....	133
Arithmetic.....	134
Comparisons.....	134
Useful Words.....	134
Stack Manipulations.....	135
Printing a BCD Number.....	135
SCHED.....	136
File Structures.....	136
Header Definitions.....	136
Loading and Memory.....	137
HELP and PRINT.....	137
Timer.....	138
Other Functions.....	138
Error Messages.....	138
DRAW.....	138
Bar Graph Format.....	139
Line Graph Format.....	140
Scientific Graph Format.....	141
Pie Graph Format.....	142
<b>Chapter 10: Valdocs System Controls and Utilities</b>	<b>143</b>
SETUP UTILITY.....	143
HELP.....	143
SYSINIT Operations.....	143
STOP.....	144
SYSINIT Operations.....	144
COPY DISK.....	145
UNDO.....	145
<b>Appendices</b>	
A. CMOS Clock Chip RAM Locations.....	146

B. Video Control and Escape Key Charts.....	150
C. QX-10/QC-10 Comparison Chart.....	152
D. Matrix/Hex Keyboard Conversion Chart.....	159
E. HASCII Extensions.....	169
F. RS-232C Pin Assignments.....	172
