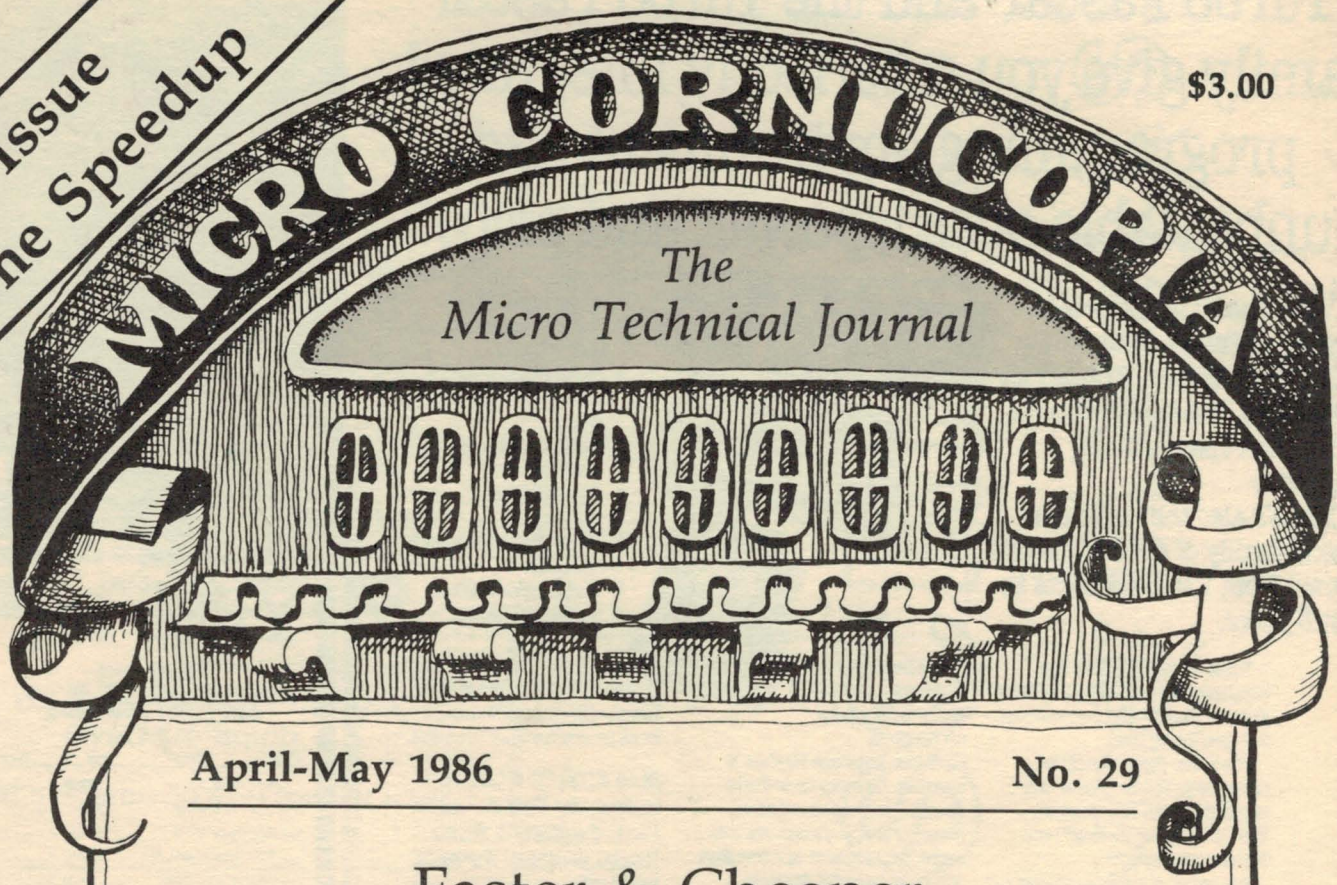
C Issue
Clone Speedup



$3.00

April-May 1986 No. 29

Faster & Cheaper

Upgrading Your XT To A Turbo For (almost) Nothing 28
If your PC or clone feels slow, here's a cheap solution.

Importing Systems From Taiwan.....38
What are the problems you face doing your own importing? What are the benefits? Here are the answers.

Porting A 68000 Assembler To The Atari ST 72
Good inside look at the 68000 and the ST.

PC RP/M2, A Designer's View Of a CP/M Emulator.....94
What are the problems faced by emulator writers and users?

C Extravaganza

C Prototyping 6
Prototyping is the most exciting part of the new C standard.

The C Environment 12
Do the C interpreters really help?

Benchmarking The Speedy PCs In C 32
Benchmarking the 6.67MHz clones, Z80s, V20s & the ST with simple C routines.

The C Competition 18
Following on the heels of the very popular Pascal Runoff.

MICRO CORNUCOPIA

The
Micro Technical Journal

Feb-March 1986 No. 28

Hot Potpourri

This Winter's Amiga 6
A software developer's first impressions of his Amiga.

PC Main Lines — A System Primer 8
Want to know what's going on inside the PC and XT? Here's a circuit by circuit overview.

Comdex (The Tale Of One Large City) 21
Nothing dramatically new, but many upgraded, cheaper versions of the old.

Home Care For The Invalid Computer (Part 2) 34
We've dealt with shake and bake so it's time for chips and dips.

Pascal Runoff — The Winners' Circle 50
What did 103 people write in Turbo Pascal? And who were the best?

Rescuing Lost Text From Memory 52
A disk error doesn't have to spell disaster, especially when what you want still resides in memory.

Drawing A Planter In 3-D 53
The best Kaypro 84 graphics we've seen (this one could grow on you).

Turbo Pascal Inline Code From A .PRN File 64
No more hand assembly for CP/M Turbo.
